

The Chicagoland Reuse Marketplace

Nicor Gas is a proud sponsor of the Chicagoland Reuse Marketplace, powered by Rheaply's technology. This platform drives the reuse of surplus inventory and materials from workspaces—such as furniture, fixtures, equipment and other building products—across the region.

Key Benefits

Extended Reach: Our sponsorship enables the marketplace to be available to an additional **650 northern Illinois communities** within Nicor Gas' service territory.

Waste Reduction: Participating stakeholders can help extend the life of reusable goods and alleviate pressure on state landfill capacities by helping to drive the reuse of surplus inventory and materials coming out of businesses such as furniture, fixtures, equipment and other building products.

Free Access: Eligible participants, including private and public sector partners, businesses, nonprofits and local government leaders, can join the platform for free.

Who Can Participate:

Small Business, Commercial and Industrial Customers:

By joining, organizations can measure their carbon avoidance and waste diversion over time while keeping valuable resources in circulation.

Municipality Leaders:

The marketplace addresses the growing challenge of managing waste and develops systems to recover the value of unwanted goods, contributing to sustainable waste management infrastructure across Illinois.

Access a reuse marketplace private to vetted organizations and governments.

Save time and money by sourcing materials locally.

Sell (or donate) goods to deserving nonprofit or small business organizations.

Reduce waste sent to Illinois landfills while reporting on waste diversion, carbon avoidance and cost savings.

Get Involved

Partners, businesses, nonprofit and local government leaders interested in participating in this federated reuse marketplace can sign up for free.
